2024 World Conference on Traditional Medicine

3 – 4 December 2024 | Beijing, China

The 2024 World Conference on Traditional Medicine will be co-sponsored by the World Health Organization (WHO), in collaboration with the National Health Commission of China, the National Administration of Traditional Chinese Medicine (NATCM), and the Beijing Municipal Government. The event will take place in Beijing, China, from 3 to 4 December 2024 and will serve as an opportunity to improve global access to traditional and complementary medicine and its integration into healthcare systems worldwide.

Diversity, Inheritance and Innovation: Traditional Medicine

The conference will be a pivotal platform to enhance dialogue among international experts, policy-makers, health workers and medicine practitioners. It will help advance progress towards Sustainable Development Goals (SDGs), particularly Goal 3 on lives and promoting well-being for all. Discussions will also focus on the WHO Strategy for Traditional Medicine (2025–2034), which was adopted at the Seventy-eighth World Health Assembly in May 2025.

Objectives

The conference will focus on several key objectives:

1. Ensuring safe, effective, and people-centered traditional and integrative medicine practices are accessible to communities.
2. Engaging stakeholders, policy-makers, and researchers between traditional medicine and modern healthcare systems to advance a One Health approach.
3. Enhancing the integration of evidence-based traditional and integrative healthcare frameworks as affirmed by the UN Political Declaration on Health Coverage.

The two-day event will include a series of panel discussions on diverse topics such as evidence-based traditional medicine, AI applications in traditional medicine research, and the status of herbal medicines. Keynote speakers will address critical issues such as regulation, integrative medicine, and the role of traditional medicine in modern healthcare.

A Global Gathering for Health Leaders

With representatives from all WHO regions, the conference will bring together governmental health leaders, Nobel laureates, health workers, and public health officials. Participants will engage in collaborative discussions at shaping the future of traditional medicine and its contribution to an attainable standard of health and well-being for all communities.
